

# WRAP Materials Pricing Report

**SIGN UP FOR FREE MATERIALS PRICES**

The Materials Pricing Report (MPR) is a free subscription service for buyers and sellers of recyclable materials. MRW produces the report for WRAP. To receive the report free of charge direct to your inbox, visit [MRW.co.uk/WRAPprices](http://MRW.co.uk/WRAPprices). Subscribers must be willing to provide regular pricing information, which will be treated in the strictest of confidence and used on an unattributed basis.

Since the last issue of MRW, **domestic mixed paper and OCC** prices rose by £35 per tonne to around £60 and £80 per tonne, respectively. All other recovered paper and board prices were broadly stable.

**Clear PET bottle** prices fell £5 per tonne to £135 per tonne, while **natural HDPE bottle** prices declined by £50 per tonne to £400 per tonne. **LDPE 98:2 film** prices fell £25 per tonne to £215 per tonne. All other recovered plastic

prices were stable.

**Steel can** prices fell almost £10 per tonne to £50 per tonne. Aluminium and mixed can prices are stable.

Recovered and textile prices were unchanged.

**PRICE TRENDS INFORMATION**

For materials specifications and more information, visit [www.wrap.org.uk/mpr](http://www.wrap.org.uk/mpr). MRW spoke to 24 businesses on 7-18 September to produce this report. \* These are MRW-produced prices and are not part of the WRAP MPR. However, the same methodology was used. † These prices contain contracted and spot prices. **PLEASE NOTE:** Quoted price ranges are typical prices for a full HGV load. Paper and plastics prices are for collected (ex-works) material, while those for glass and cans are for material delivered to a UK reprocessor or port. Paper and glass prices typically apply to all loads collected/delivered over a fixed period, for example one month, while plastics and cans prices are typically agreed on a load-by-load basis.
